PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with hands-on experience building production-style web applications using React.js, Node.js, TypeScript, MongoDB, and PHP/MySQL. Skilled in developing real-time, authenticated platforms with REST APIs, JWT security, and Socket.IO. Built and shipped multiple full-stack projects covering developer collaboration tools, backend API services, and e-commerce systems. Comfortable working with modern development tooling, Git-based workflows, and AI-assisted development tools to write clean, maintainable code faster.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, SQL
Frontend: React.js, React Router, HTML5, CSS3, Bootstrap, Responsive Design
Backend: Node.js, Express.js, PHP, REST APIs, JWT Authentication, Socket.IO
Database: MongoDB, MySQL
Tools & Platforms: Git, GitHub, Vite, VS Code, npm, Swagger, Axios, Fetch API
AI-Assisted Development: Microsoft Copilot, OpenAI Codex
Concepts: CRUD Operations, Component-Based Architecture, DOM Manipulation, API Documentation, Cross-Browser Compatibility, Performance Optimization, Version Control

PROFESSIONAL EXPERIENCE

Front-End Developer Intern — Wappzo InfoTech (3 Months) July 2026 – Sep 2026

- Developed 8+ responsive webpages, improving mobile compatibility across multiple screen sizes.
- Assisted in implementing PHP & MySQL authentication and dynamic database functionality.
- Resolved 20+ UI bugs and improved overall page responsiveness.
- Collaborated with the development team using Git and GitHub for version control.

PROJECTS

CodeBit — Developer Collaboration Platform — Personal Project 2026

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, JWT, Socket.IO

- Built a full-stack platform for developers to discover, create, and apply to collaborative projects.
- Implemented JWT-based authentication with role-based access for project owners and members.
- Developed task management, member collaboration, and in-app communication features.
- Added real-time updates and notifications using Socket.IO for live collaboration.
- Integrated GitHub within projects for repository linking and progress tracking.

CodeBit API — Backend Service for CodeBit — Personal Project 2026

Tech Stack: Node.js, Express, TypeScript, MongoDB, JWT, Swagger, Socket.IO

- Designed and built a dedicated REST API backend for the CodeBit platform.
- Modeled application data in MongoDB with structured, scalable schemas.
- Secured endpoints using JWT authentication and implemented role-based authorization.
- Enabled real-time events between backend and client using Socket.IO.
- Documented all API endpoints with Swagger for easy integration and testing.

Jobsphere — Online Job Portal— Personal Project 2026

Tech Stack: React.js, JavaScript, React Router, Axios, Bootstrap, REST APIs, Vite

Built authentication, job posting, job search, filtering, application management, and profile management.

Developed a modern job portal using React.js with recruiter and candidate dashboards.

- Implemented complete CRUD functionality using REST APIs.
- Designed reusable React components and responsive UI using Bootstrap.

EDUCATION

Bachelor of Computer Applications (BCA) — Naran Lala College 2023 – 2026

Naran Lala College of Professional & Applied Sciences, Navsari, Gujarat
CGPA : 6.0
